Bitmap2LCD is a powerful GLCD editor and batch processor. It offers an integrated Graphics Editor and Bitmap Editor. Both of them are designed to allow you to draw bitmaps and graphics in high resolution on any GLCD-compatible printer. A Graphic Editor is used to make drawings in High DPI bitmaps, using a special drawing mode, that works well with any GLCD printer. With Bitmap2LCD you can convert DPI bitmaps into GLCD compatible ones (1, 2, 4, 8 or 16 bit per color), change the size of the bitmap, set the scaling and antialiasing, change the colors, set the color depth, among many other features. You can also edit text and graphic bitmaps. Using

Text2LCD, you can convert text bitmaps into GLCD compatible ones, and add texts to drawings. You can also align text in the drawing, change the size of the text, as well as change the color of the text, set a number of features. Bitmap2LCD can also export bitmaps and graphics to several formats (GIF, JPG, PNG, PPM, BMP, PWG, PCX, TGA and many more). You can also make animations and play sequences with any drawing tools. Bitmap2LCD is a free product, but you have the option to purchase upgrades for the following versions: Bitmap2LCD Plus, which adds the GIF Animation Editor and Sequence Player, for the price of US$ 14.95. Bitmap2LCD Pro, which adds the file size limit for bitmap files up to 200 MB for a price of

US$ 14.95. Bitmap2LCD Enterprise, which adds the file size limit for bitmap files up to 200 MB, the GLCD printer menu, an option to save the same bitmap in various resolutions, a user name and a password, and many other features, for the price of US$ 249.95. What is new in this release: • The addition of a new GLCD printer option to support the use of GLCD printer with non-standard nibs. • The improvement of the user interface of Bitmap2LCD Standard Edition. • The new application description and it's design changes. • All the bug fixes. Bitmap2LCD Standard Edition - color to monochrome GLCD color converter Simple installation process You can get started with this app in practically no time, mainly thanks to its simplistic and streamlined installer. Once launched, you are bound to discover a fairly non-intuitive interface, composed out of multiple, separate windows. Without a doubt, a small adjustment period is required until you fully locate the app's plethora of features, scattered around multiple windows. Packs a plethora of useful features for designing personalized graphics for GLCD displays The first thing you should be aware of is the fact that this application can be considered

both a graphic editor and a color depth converter for monochrome GLCD, as well as for 8, 16, 256, 4096, 65K, 252K, 16M colors GLCDs. Furthermore, you can easily convert color images into black and white. With the help of the integrated features specialized on fonts, you can easily generate and edit, as well as import and convert both System and Editable fonts. Some of the most interesting tools surely are the GIF Animation editor and sequence player. With the help of these features, you can easily export projects for C, Pascal, Basic and even assembler codes. In addition, the application also packs tools for automatic text search and replace, as well as for text and graphic batch processing. Powerful and feature-packed graphics creator end editor

Taking everything into consideration Bitmap2LCD Standard Edition is a useful application that manages to pack a plethora of specialized features for designing graphics for GLCD displays. While the app's highlight is clearly its multitude of tools, the interface is probably the app's weakest point, even though it is fairly nice looking. A modern tabbed interface with a slick layout might be more at home for most users out there. Bitmap2LCD Lite is a specialized and comprehensive piece of software that aims to be a Swiss Army-like tool for graphic programming and programmable batch processing for automatic text and other visual tasks.
