need to change the keystrokes every time you want to save your file. KEYMACRO is not only for typing. It can be used to control other applications. You can add KeyMacro to your favorite application, such as Microsoft Word, and save your file.

123 Macro Recorder Description: 123 Macro Recorder is a comprehensive free automation application for Windows, and is capable of recording macros in Word, PowerPoint, Outlook and many more applications. 123 Macro Recorder works well as a batch recorder or as a real-time recorder that will record all keystrokes made on your Windows computer. Once the recording has started, you can pause and resume it at any time. You can save the recorded macro in text or binary format. Once you have recorded your macros, you can add them to your favorite text-editing application, such as Notepad.

AutoHotkey Description: AutoHotkey is a free and easy-to-use program that allows you to use simple shortcuts that can be assigned to your own hotkeys, instead of using the Windows keyboard. With a few easy to remember hotkeys, you can perform many repetitive tasks you would normally do in the operating system. If you use the Ctrl+Shift+D hotkey combination, you can easily copy the contents of a window, word, or webpage. So for example, you can use this hotkey combination to paste the contents of the Clipboard into a new document. You can also use the Ctrl+R hotkey to search for the word in a document. Just enter the search text and AutoHotkey will search for it in the selected file. The list of keystrokes that you can use is very long. You can also use scripts to automate more advanced tasks. You can also use the keystrokes to quickly and easily switch to your desktop and back. The basic installation process is simple. You just click "Run Program", and AutoHotkey will begin to download and install itself. When finished, you will see the familiar AutoHotkey interface.
