## What's New In?

**Date / Time Calcs Description** Date / Time Calcs is a small, simple and easy-to-use application that allows the user to perform various date / time calculations. You can insert the current date, today's date, or the current month and display the output as date, day of the month, month and year, or a date / time string. **More Date / Time Calcs Features:** \* You can enter date / time calculations from 00:00:00 (midnight) to 23:59:59 (midnight). \* After entering the date, the program will display the current date, today's date, or the current month in the specified format. \* After entering the date / time, you can specify if the result should be displayed as date, day of the month, month, or date / time string. \* You can also specify the

---

format of the result. \* You can also enter date / time calculations from the month specified by the current date and display the results as date, day of the month, month, or date / time string. Date / Time Calcs can be easily be installed by running the provided Windows Installer. You can also choose to view the date / time calculations for the current month or the current year. You can also run the program in the background to display the date / time calculations of the current month / year as soon as the program is started. Date / Time Calcs is the kind of program that will always have some use, and some users may see some of the features as being more than necessary. However, there are also some users who may appreciate all the features that are included in the application. Date / Time Calcs enables you to display the date / time calculations for any month of any year. You can also easily search the date / time calculations for the current month / year. After

---

displaying the date / time calculations of the current month / year, you can easily drag the display window to select the month / year that you wish to view the calculations for. You can also easily change the format of the date / time calculations to be displayed. For example, you can specify the date / time calculations in the format of "ddd, d MMM YYYY", the "dddd, d MMMM YYYY", or in the "dddd, d MMMM, YYYY". After specifying the date / time calculations to be displayed in the format that you wish, you can also easily specify if the output should be displayed as date, day of the month, month, or date / time string. You can also enter any date / time calculations from the month specified by the current date and display the results as date, day of the month, month, or date / time string. You can also enter the date / time calculations
