Altova Authentic Community Edition Media Gallery: Altova Authentic Community Edition Developer: Altova is a privately-held company based in Burlington, Massachusetts, USA, founded by three software veterans. They are committed to the standards of open source, and invest significant time and energy into developing, documenting, and promoting their products. Altova was founded in October, 2002, by Terry Munger, Bill Ray, and Joe Bobbitt, as an independent software vendor focused on the needs of knowledge workers, business users, and power users. Over the last ten years, Altova products have been used by thousands of businesses worldwide, and the company has been active in a number of communities, including the OASIS Open Document Format Initiative. Altova products are published under the terms of the Altova Public License, a liberal, permissive license which requires that the source code for all Altova products be freely available.
