Impression Designer Description: Create the Flash-based themes used in Adobe Flash Builder (Studio) through a robust and intuitive graphical interface. Impression Designer Review: Impression Designer is a program for creating Flash-based presentations. It supports Flash Builder 3.0 and Flash Builder 4.0. In the mean time the developer has put out an update. Inexpensive vs. Expensive: When it comes to comparing Impression Designer, Adobe Flex SDK, Flash Catalyst, the company that makes Flash CS3 and Flash CS4, recently released a product, created Flash Builder 4.0 for creating Flash-based applications, FLA applications, that is, using the Flash application authoring tool called Flash Catalyst. And to compare Impression Designer with this, and its competitors, Adobe Flex SDK and Flash Builder 4.0, we need to compare it with another (other than these two) and expensive application. Most of the Flash application creation applications I have reviewed lately are expensive. You can learn more about those applications in the XCAPI list. We will compare Impression Designer and Adobe Flex SDK and Flash Builder 4.0. I will review Impression Designer, Flash Builder 4.0, Flash Catalyst, and the company that makes Flash CS3 and Flash CS4, recently released a product, created Flash Builder 4.0 for creating Flash-based applications, FLA applications, that is, using the Flash application authoring tool called Flash Catalyst.

Impression Designer is inexpensive and still has many features that are missing from the other two programs. But they have many similarities and can be used together. Impression Designer has many features that Flash Builder 4.0 has that Flash Builder 3.0 doesn't have. So if you are looking for an inexpensive application to create Flash-based presentations and don't need to use Flash Builder 4.0, Adobe Flex SDK or Flash Catalyst, Impression Designer is a suitable application. Impression Designer is very easy to use and has some nice features that it has that the other applications don't have. But it also has some small drawbacks that all of the others don't have.
